\* Provisional sample data (or percent change based on provisional sample data) from the 1980 census which will be superseded later by final sample data.

r Revised. The urban and rural data are consistent with the unrevised total of 3,109,519.

<sup>1/</sup> 1970 and 1980 data are not totally comparable because of changes in census procedures and in the self-identification of respondents.

<sup>2/</sup> For 1980, includes Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, and Samoan. For 1970, includes Japanese, Chinese, and Filipino.

<sup>3/</sup> For 1970, excludes Eskimo and Aleut.

<sup>4/</sup> Assumes all 14 year olds were single in 1970. (Marital status data in 1970 were published for persons 14 years and over.)

<sup>5/</sup> Includes persons born in Puerto Rico, outlying areas, and persons born abroad of American parents, not shown separately. For 1970, excludes persons for whom state of birth was not reported, who represented 6.3 percent of the native population in the SMSA. (Nonresponse was allocated in 1980.)

<sup>6/</sup> Data on income and poverty are based on money income only, and do not include noncash benefits. 1969 income in 1979 dollars is 1969 income multiplied by 1.98.

<sup>7/</sup> Excludes inmates of institutions, persons in college dormitories and in military quarters and unrelated individuals under 15 years.
